AMENDMENTS TO THE CLAIMS

The following listing of claims replaces all previous listings.

1. (currently amended) A method of providing discriminated partner system

   resources to a user of a host system during a single login session comprising:

   receiving a request to access partner system resources through said host system;

   receiving host system data;

   identifying said host system;

   receiving user data;

   identifying said user based at least in part on said user data; and

   ~~identifying discriminated partner system resources associated with said host~~

   ~~system and with said user~~ providing discriminated partner system

   resources to said user, said discriminated partner system resources being

   selected according to a preexisting association between the host system and

   the partner system, and a preexisting association between the user and the

   partner system.

2. (original) The method of claim 1 wherein receiving host system data comprises

   receiving host system data from said host system.

3. (original) The method of claim 1 wherein identifying said host system comprises

   identifying said host system based at least in part on said host system data.

4. (original) The method of claim 1 wherein receiving user data comprises receiving

   user data from said host system.

5. (original) The method of claim 1 further comprising authenticating said request to

    access partner system resources.

6. (original) The method of claim 1 further comprising transmitting said discriminated

    partner system resources to at least one of said host system and said user.

7. (original) The method of claim 1 wherein said partner system resources and host

    resources are accessible through a web browser.

8. (original) The method of claim 1 wherein said user data comprises a user name and

    a user password.

9. (original) The method of claim 1 wherein said user data comprises authentication

    data provided by a single sign on authentication system.

10. (currently amended) The method of claim 1 wherein said step of ~~identifying~~

    ~~discriminated partner system resources associated with said host system and with~~

    ~~said user~~ providing discriminated partner system resources to said user further

    comprises:

        identifying said user's financial account data ~~credit card account number~~; and

        selecting, based at least in part on said financial account data, a discriminated

            web page identified with said host system from a plurality of discriminated

            web pages.

11. (currently amended) The method of claim 1 wherein said step of ~~identifying~~

    ~~discriminated partner system resources associated with said host system and with~~

    ~~said user~~ providing discriminated partner system resources to said user further

    comprises:

identifying said user's **financial account data** ~~credit card account number~~; and

creating discriminated partner system resources identified with said host system.

12. (previously presented) The method of claim **11**, wherein said step of creating

discriminated partner system resources comprises the steps of:

identifying graphical information used by said host system;

replicating said graphical information;

classifying said host system;

identifying non-conflicting additional partner system resources that do not

conflict with said host system's classification; and

incorporating said replicated graphical information and said non-conflicting

additional partner system resources into a standard partner system resource

to create a discriminated partner system resource.

13. (currently amended) A method of providing discriminated partner system

resources to a user of a host system during a single login session comprising the

steps of:

receiving user data;

presenting an option to access a partner system to said user;

receiving a request to access said partner system from said user;

receiving partner system resources from said partner system;

determining, in response to said request, whether said partner system resources

are discriminated; and

modifying said partner system resources to be discriminated partner system

resources if it is determined that said partner system resources are not

discriminated, **and providing said discriminated partner system resources**

to said user.

14. (original) The method of claim 13 wherein receiving user data comprises receiving

user data from said user.

15. (original) The method of claim 13 further comprising authenticating said user to use

said host system based at least in part on said user data.

16. (original) The method of claim 13 further comprising sending identification data to

said partner system to uniquely identify said host system.

17. (original) The method of claim 13 further comprising sending at least part of said

user data to said partner system.

18. (original) The method of claim 13 further comprising transmitting said

discriminated partner system resources to said user.

19. (original) The method of claim 13 wherein said partner system resources and host

resources are accessible through a web browser.

20. (original) The method of claim 13 wherein said user data comprises a user name

and a user password.

21. (original) The method of claim 13 wherein said user data comprises authentication

data provided by a single sign on authentication system.

22. (original) The method of claim 13 wherein said user data is stored on a portable

storage device.

23. (original) The method of claim **13** wherein said step of presenting an option to access said partner system to said user comprises displaying an Internet hyperlink to said user.

24. (previously presented) The method of claim **13** wherein said step of modifying said partner system resources to be discriminated partner system resources further comprises incorporating said host system's discriminatory features into said partner system resources.

25. (original) The method of claim **24** wherein said step of incorporating said host system's discriminatory features into said undiscriminated partner system resources comprises selectively removing information from the undiscriminated partner system resources.

26. (original) The method of claim **24** wherein said step of incorporating said host system's discriminatory features into said undiscriminated partner system resources comprises selectively adding information to the undiscriminated partner system resources.

27. (original) The method of claim **24** wherein said step of incorporating said host system's discriminatory features into said undiscriminated partner system resources comprises selectively modifying the undiscriminated partner system resources.

28. (currently amended) A system for providing discriminated partner system resources to a user of a host's system resources during a single login session comprising a partner system for providing partner system resources through a computer network, wherein said partner system comprises:

a set of instructions for receiving a request to access partner system resources

through said host system;

a set of instructions for receiving host system data;

a set of instructions for identifying a host system;

a set of instructions for receiving user data;

a set of instructions for identifying said user based at least in part on said user

data; and

a set of instructions for ~~identifying discriminated partner system resources~~

~~associated with said host system and with said user~~ providing

discriminated partner system resources to said user, said discriminated

partner system resources being selected according to a preexisting

association between the host system and the partner system, and a

preexisting association between the user and the partner system.

29. (original) The system of claim **28** wherein said set of instructions for receiving host

system data comprises instructions for receiving host system data from said host

system.

30. (original) The system of claim **28** wherein said set of instructions for identifying a

host system comprises instructions for identifying the host system based at least in

part on said host system data.

31. (original) The system of claim **28** wherein said set of instructions for receiving user

data comprises instructions for receiving user data from said host system.

32. (original) The system of claim **28** further comprising a set of instructions for

authenticating said request to access partner system resources.

33. (original) The system of claim **28** further comprising a set of instructions for

transmitting said discriminated partner system resources to at least one of said host

system and said user.

34. (original) The system of claim **28** wherein said partner system said host system are

accessible through a web browser.

35. (original) The system of claim **28** wherein said user data comprises a user name and

a user password.

36. (original) The system of claim **28** wherein said user data comprises authentication

data provided by a single sign on authentication system.

37. (currently amended) The system of claim **28** wherein said set of instructions for

~~identifying discriminated partner system resources associated with said host~~

~~system and with said user~~ providing discriminated partner system resources to

said user further comprises:

  a set of instructions for identifying said user's **financial account data** ~~credit card~~

    ~~account number~~; and

  a set of instructions for selecting**, based at least in part on said financial account

    data,** a discriminated web page identified with said host system from a

    plurality of discriminated web pages.

38. (currently amended) The system of claim **28** wherein said set of instructions for

~~identifying discriminated partner system resources associated with said host~~

~~system and with said user~~ providing discriminated partner system resources to said user further comprises:

- a set of instructions for identifying said user's **financial account data** ~~credit card account number~~; and

- a set of instructions for creating discriminated partner system resources identified with said host system.

39. (original) The system of claim **38**, wherein said set of instructions for creating discriminated partner system resources comprises the steps of:

a set of instructions for identifying graphical information used by said host system;

a set of instructions for replicating said graphical information;

a set of instructions for classifying said host system;

a set of instructions for identifying non-conflicting additional partner system resources that are do not conflict with said host system's classification; and

a set of instructions for incorporating said replicated graphical information and said non-conflicting additional partner system resources into a standard partner system resource to create a discriminated partner system resource.

40. (currently amended) A system for providing discriminated partner system resources to a user of a host's system resources during a single login session comprising a host system for retrieving and transmitting partner system resources through a computer network, wherein said host system comprises:

a set of instructions for receiving user data;

a set of instructions for presenting an option to access said partner system to said

user;

a set of instructions for receiving a request to access said partner system from

said user;

a set of instructions for receiving partner system resources from said partner

system;

a set of instructions for determining, in response to said request, whether said

partner system resources are discriminated; and

a set of instructions for modifying said partner system resources to be

discriminated partner system resources if it is determined that said partner

system resources are not discriminated, **and providing said discriminated**

partner system resources to said user.

41. (original) The system of claim **40** wherein said set of instructions for receiving user

data comprises instructions for receiving user data from said user.

42. (original) The system of claim **40** further comprising a set of instructions for

authenticating said user to use said host system based at least in part on said user

data;

43. (original) The system of claim **40** further comprising a set of instructions for sending

identification data to said partner system to uniquely identify said host system.

44. (original) The system of claim **40** further comprising a set of instructions for sending

at least part of said user data to said partner system.

45. (original) The system of claim **40** further comprising a set of instructions for

transmitting said discriminated partner system resources to said user.

46. (original) The system of claim **40** wherein said partner system and host system are

accessible through a web browser.

47. (original) The system of claim **40** wherein said user data comprises a user name and

a user password.

48. (original) The method of claim **40** wherein said user data comprises authentication

data provided by a single sign on authentication system.

49. (original) The system of claim **40** further comprising a portable storage device for

storing user data.

50. (original) The system of claim **40** wherein said set of instructions for presenting an

option to access said partner system to said user comprises instructions for

displaying an Internet hyperlink to said user.

51. (original) The system of claim **40** wherein said set of instructions for modifying said

partner system resources to be discriminated partner system resources further

comprises instructions for incorporating said host system's discriminatory features

into said partner system resources:

52. (original) The system of claim **40** wherein said set of instructions for incorporating

said host system's discriminatory features into said undiscriminated partner system

resources comprises instructions for selectively removing information from the

undiscriminated partner system resources.

53. (original) The system of claim **40** wherein said set of instructions for incorporating

said host system's discriminatory features into said undiscriminated partner system

resources comprises instructions for selectively adding information to the

undiscriminated partner system resources.

54. (original) The system of claim **40** wherein said set of instructions for incorporating

said host system's discriminatory features into said undiscriminated partner system

resources comprises instructions for selectively modifying the undiscriminated

partner system resources.
